venminder

Software Overview - Enterprise

Centralize, automate, assess and report on vendors.

Dedicated to the efficient and effective management of your vendor's lifecycle.

Venminder is a recognized leader of third-party risk management. Our platform provides you with all the capabilities to run a successful program that is aligned to today's best practices and enable you to meet strict regulatory guidelines.

It allows you to effectively and efficiently organize, track and report findings on your vendors throughout the lifecycle of the relationship. It guides through critical processes such as contract management, risk assessments, due diligence requirements, questionnaires and task management.

Key Benefits

Unlimited users, vendors and contracts

Built for collaboration, there is no limit on users, vendors or contracts you manage, Venminder clients use the software for anywhere from 10 to 14,000+ vendors.

Configurable to fit your model

The software is flexible and can be easily configured (code-free) to fit your organization's unique processes.

Scalable to grow with your program

As your program grows and matures, the software has all the functionality and features to meet your program growing needs.

Robust custom reporting tool

Fully customize, track and schedule reports to have clear visibility to make decisions more efficiently. Dashboards also help centralize quick actions and analytics.

Unlimited custom vendor data points

Create and manage as many fields within the system as you need. Easily report on any data point created.

Frequent software enhancements

Commited to investing in product innovation, Venminder ensures the software continually meets and exceeds industry best practice and aligns to any changing regulations.

Easily search and order from the Venminder Exchange

Accelerate your due diligence efforts and reduce the workload by searching the library, previewing vendor scores and purchasing completed control assessments.

Full customer support and training

Build a collaborative partnership with full support including product training, implementation assistance, continued education and access to subject matter experts.

The Venminder platform has all the functionality you need.

Venminder drives process consistency, helps to reduce the overall workload and gives valuable insight into the risks a third party poses.

Venminder Exchange

Accelerate your due diligence efforts and reduce the workload.

Easily order new or search the library for Control Assessments as and when you need.

Vendor Onboarding

Direct new vendor requests through a series of due diligence reviews prior to adding to the platform.

Contract Management

Gain complete control and management of your contracts with reminders and critical contract data entry.

Risk Assessment

Perform both inherent and residual risk assessments and get risk ratings on all your vendors. Easily customize your scoring preferences and invite collaborators.

Questionnaires

Automate the collection of data and documentation from your vendors. Score within questionnaires.

Oversight Management

Mitigate risk through monitoring and oversight by creating or scheduling tasks and viewing Vendor Oversight Status Reports.

Oversight Automation

Automate what due diligence items your program requires based on the vendor's Risk (inherent risk with critically and NPI Access variables) or custom Categories.

Advanced Workflows

Drive process consistency by allowing you to define and automate required activities or tasks using rule-based logic.

Issue Management

Centralize and implement processes that guide internal collaborators through the lifecycle of an issue.

SLA Management

Manage, remediate and record service level agreements.

Reporting

Meaningful, easy-to-use and fully configurable reports for clear visibility into your vendors.

Business Unit Permissions

Create unlimited business units with unique permissions and assign unlimited vendor products or users to one or more business units.

Integrations

- ✓ API and SSO integration options
- ✓ ArgosRisk® AR Surveillance© Integration
- ✓ SecurityScorecard Integration
- ✓ RSA Ready Technology Partner

Support & Education

- ✓ Unlimited Support and Training
- ✓ Access to Subject Matter Experts
- ✓ eLearning Opportunities
- ✓ Free Education
- ✓ Online Community

venminder

Manage Vendors. Mitigate Risk. Reduce Workload.
